Guglielmo Tamburrini (PhD 1987, Columbia University) is Philosophy of Science and Technology Professor at Universita' di Napoli Federico II, Italy. His main research interests concern the methodology of robotics, AI and the cognitive neurosciences, in addition to ELS issues arising in the context of human-computer and human-robot interactions. He acted as coordinator of the first EC project on the ethics of robotics (CA ETHICBOTS, 2005-2008, VI FP). Visiting Scholar at ZIF (Zentrum für Interdisziplinäre Forschung, Universität Bielefeld) in 2009-10, in 2014 he was awarded the Giulio Preti International Prize by the Regional Parliament of Tuscany (Italy) for his research and teaching activities on ethical and social implications of ICT and robotic technologies. He is member of ICRAC (International Committee for Robot Arms Control). More info about publications and research activities at the url https://www.docenti.unina.it/guglielmo.tamburrini
